

Application No.: 09/854,557

Docket No.: 21994-00022-US1

**AMENDMENTS TO THE SPECIFICATION**

Please amend page 39, line 24, through page 40, line 2, as follows:

In a disc of type 2, tracks ~~tracks~~ of track numbers 2 and 5, which are intermediate areas at both sides of the track, are asymmetrical with respect to a center axis. At a boundary of the track, a tracking error signal by the differential push-pull system can be continuously obtained within some extent of amplitude difference although the tracking error signal can not be accurately recorded or reproduced due to the amplitude difference or generating offset.
